Technical Skills

Front-End	Back-End	Other
HTML5	CSS3	JavaScript	Node.js	Express	PostgresSQL	Sequelize	Mongoose
React	Angular	jQuery	MongoDB	Python	Django	Git/Github	VS Code

Projects

Danmaku - *Javascript • CSS3 • HTML5 • jQuery*
- Created a JavaScript-based arcade game using Object-oriented programming and DOM manipulation.
- Players deftly outmaneuver and trade fire with enemy spaceships in order to earn a high score.

Good Market - *Python • Django • JavaScript • CSS3 • PostgresQL • Stripe API*
- Collaborated with 2 other developers to make an e-commerce site where users could donate a portion of each sale to a charity of their choosing,
- Created a checkout cart where users could purchase items via the integrated Stripe API.

MovieList - *Node • Express • PostgreSQL • Sequelize • OMDB API*
- Developed a film-cataloguing, web app where users can track, rate, and receive statistics about their favorite movies.

Punch Card - *React • Node • Express • MongoDB • Mongoose • JavaScript*
- Worked alongside 3 other developers to create a mock-up application which allows restaurants to digitize their wards cards and for users to punch them on their phone.
- Wrote the backend API and integrated user and restaurant data into the REACT front-end.

Experiences

Freelance Home Services   June 2014 – May 2018
Residential Clients, Bainbridge Island, WA
- Catered to a variety of freelance clientele requests ranging from house and yard maintenance, to pet care, farm-work, and moving.

Visual Media Blogger - *Cauthan.wordpress.com*   April 2015 - June 2017
- Created and maintained a self-directed, visual-media blog which accumulated over 25,000 views and a dedicated social following over it's two-year span.
- Contributed over 200 posts including over 100 analytical reviews and in-depth summaries of contemporary TV shows and movies.

Education & Awards
